PROFESSIONAL SUMMARY

Android developer with 3+ years of experience building scalable mobile applications using Kotlin, Jetpack Compose, MVVM, and Clean Architecture. Experienced in API integrations, cross-platform development, performance optimization, and delivering client-focused software. Currently pursuing graduate studies in strategic management of information systems.

WORK EXPERIENCE

Freelance Android Developer Remote | 2024 - Present

- Designed, developed, and delivered Android applications using Kotlin, MVVM, and Clean Architecture.
- Built solutions across finance, real estate, productivity, and other domains.
- Integrated REST APIs, Firebase, Room/SQLite, and cloud services.
- Improved responsiveness, performance, maintainability, and user experience through modular design.

Co-Founder | Qimora Agency May 2025 - Present

- Co-founded a software agency delivering tailored solutions for startups and small businesses.
- Led 10-15 discovery meetings and delivered two end-to-end client projects.
- Worked directly with clients to define requirements, incorporate feedback, and deliver business value.
- Helped evolve a custom business application into a multi-tenant SaaS platform.

SELECTED PROJECTS

RepaNova POS - Retail ERP SaaS

Kotlin, Compose Multiplatform, Firebase, Cloudflare R2. Developed a cross-platform retail system covering sales, inventory, customers, repairs, debt, and finance. Worked through a four-month feedback cycle, tested across environments, and adapted the architecture for multi-tenant SaaS use.

Entrepreneur Networking Platform

Kotlin, Jetpack Compose, Firebase, Cloudflare R2. Built networking features for entrepreneurs, investors, and suppliers, including authentication, profiles, messaging, cloud synchronization, and file storage.

Law App - Legal Consultation Platform

Built an MVP for consultation requests, document uploads, case tracking, and communication between clients and lawyers.

Bio Fresh - Food Waste App

Built an Android app using Jetpack Compose and Firebase for real-time food waste reduction. Recognized by World Learning Algeria for social impact and technical innovation.

Smart TV App - University

Built a Jetpack Compose and Firebase-based Android TV application for university announcements, events, and dynamic content.

EDUCATION

Master’s in Strategic Management of Information Systems Currently studying

École Nationale Supérieure de Management (ENSM), Algeria

Graduate studies combining information systems, organizational strategy, and management.

Bachelor of Computer Science with Honours Aug 2023 - Oct 2026

University of Tahri Mohamed Bechar, Algeria

Thesis: “AI-Powered Medical Diagnosis Application Using MVVM Architecture.”

Diploma in STEAM Mentorship May 2024

World Learning | Mentorship in leadership, project-based learning, and educational outreach.

TECHNICAL SKILLS

Languages: Kotlin, Java, C, Python, JavaScript

Mobile: Android SDK, Jetpack Compose, Compose Multiplatform, Retrofit, Room, WorkManager

Architecture: MVVM, Clean Architecture, modular design, multi-module applications

Cloud and tools: Firebase, Cloudflare R2, Git, GitHub, Gradle, Hilt, Koin

Testing: JUnit, MockK, unit testing, Compose UI testing

Performance and UI: Memory and battery optimization, Material Design, responsive layouts, custom components

Web: React.js

ADDITIONAL INFORMATION

Languages: Arabic (native), English (fluent), French (intermediate)

Recognition: Speaker at Biskra Reads AI event (2025); fifth place in an AI competition in Oum El Bouaghi (2025).

Location: Algeria | Available for remote opportunities
